Education

University of Wisconsin–Green Bay Expected May 2028
B.S. Computer Science, Artificial Intelligence Emphasis *GPA: 3.5/4.0*

- Phoenix Academic Scholarship
- Current coursework: Computer Architecture and Organization; Database Design and Management.
- Additional coursework: Data Structures and Algorithms, Object-Oriented Programming, Software Development, Web Development, Java and C++.

Experience

Software Developer September 2025 – January 2026
SaiKet System *Remote*

- Developed application features using Java, Python, C++ and C# while maintaining existing software.
- Diagnosed defects through debugging and testing to support application quality and reliability.
- Collaborated with developers through Agile meetings and peer code reviews.

Software Developer Intern May 2025 – September 2025
Depplesoft *Remote*

- Built and enhanced software with developers to address business and customer requirements.
- Investigated application issues, identified root causes and implemented fixes; supported testing, quality assurance and deployment.
- Used SQL to support application data and backend functionality; collaborated using Git and GitHub and prepared technical documentation.

Projects

AI Chat Application | *JavaScript, Node.js, Express, REST APIs* Summer 2026

- Built a full-stack conversational application connecting user interactions to AI-generated responses through RESTful backend services and an external AI API.
- Debugged API integrations and application behavior; maintained source code with Git.

Tanning Tropical Business Website | *React, JavaScript, Vite* Summer 2026
github.com/dhrutpatel277-bot/Tanning-Tropical

- Built a responsive salon website presenting services, pricing, branding and contact information.
- Optimized mobile responsiveness and deployed to Vercel: tanning-tropical.vercel.app.

Student Management System | *Java, OOP, File I/O* Spring 2026
github.com/dhrutpatel277-bot/student-management-system

- Implemented student record creation, updates and deletion, GPA management, searching and sorting.
- Added persistent file storage and input validation with modular, object-oriented code.

Personal Expense Manager | *Python, CSV* Fall 2025
github.com/dhrutpatel277-bot/ExpenseManager

- Developed expense recording and analysis with CSV-based storage, reporting and automated summaries.

Technical Skills

Languages: Java, Python, JavaScript, SQL, C++, C#, HTML, CSS
Web and Data: React, Node.js, Express, REST APIs, relational databases, data modeling
Tools and Practices: Git, GitHub, VS Code, Eclipse, Visual Studio, testing, debugging, Agile, SDLC
